**=EOA= Players Consortium**

**For those of you who requested an update, here it is! We have released a new 3D hardware support update for those with newer computers.**

**This version of the flconfigdatabase.txt file should be the last one you will ever need because it automatically supports all newer ATI, Intel, nVidia, and SiS hardware whether it is a standalone device or an onboard/integrated chipset. You will never need to update again.**

**To install it just extract the file to your EXE folder and overwrite the existing file.**

**If you have any problems please let me know.**

**Come check us out for this and many other cool, classic Freelancer goodies.**
